Trellis Section

**OUTSIDE READING GARDEN** – Macsherry Library in Alexandria Bay has contracted with Brian Jones of Aubertine and Currier Architects to design an Outside Reading Garden. In 2005 the Community Betterment Foundation contributed funds from its Paddle for Community Betterment to this project. Additionally, Macsherry Library was the benefactor of a grant from the Sweetgrass Foundation that was earmarked for the same project. Several individuals also have contributed throughout the year. The Alexandria Bay Gardening Club has donated a flowering crab tree to be planted adjacent to one donated in the memory of Audrey Hildebrand. Through the generosity of these individuals Macsherry Library will be able to break ground on the Outside Reading Garden this fall. The project may be done in stages as funds become available to complete it. Anyone interested in contributing to this project may contact the staff or any board member of Macsherry Library.
